DEKKA 500

Fully Automatic Case Erector

The DEKKA 500 is a heavy duty fully automatic case erector developed for the entry level market. This compact machine is ideal for customers looking to upgrade to automatic machinery with a tight budget and limited floor space. The DEKKA 500 is able to reach speeds of up to 10 cases per minute, perfect for light manufacturers operating a low-speed automated packaging line. It also features a full color touchscreen HMI, operator friendly color coded change handles and pictorial guides and is also optimized for the high performance Dekka tape head, ensuring an effective and reliable case seal.

FEATURES

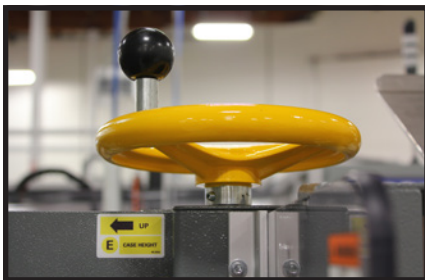

Developed and constructed with heavy duty components for long lasting performance

Full color 5" HMI touchscreen for easy and intuitive machine operation

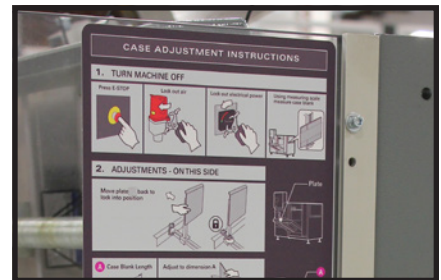

Compact design allows machine to fit in small operations

Color-coded size change labels and minimal amount of change points allow for quick and easy size changes

Reliable case sealing with the industry leading high performance Dekka tape head

User friendly pictorial guides allow for easy training and operation
